Horticultural Spraying Specialists
12-volt and motorised trailed sprayers

Horticultural
Spraying Specialists™
helping growers make better decisions

Small trailed sprayers offer many benefits for horticultural growers. Quick to hook up to an RTV or small tractor, they cut down the time needed to get out and spray when conditions allow. There is no PTO shaft to grease or fit up to a tractor. For small to medium holdings, these are a very practical product.

Booms up to 6 metres can be fitted allowing for pasture spraying or under-tree/vine spraying, including the versatile covered spray boom. Likewise, a boomless nozzle kit can be fitted to spray up to 6 metres in width. In nursery or small farms situations, a motorised Honda-powered pump can be fitted with reels holding up to 100 metres of spray hose – although 20-30 metres is more common.

Models include:

Above: 12-volt model with 4-metre boom
Below: Motorised unit with 20m hose-reel

Above - covered boom can be fitted

Boomless nozzle kit

12-volt model includes:
⇒ 20 litre per minute* 12-volt pump with power cable and on/off switch for pump
⇒ Optional 4 & 6 metre cross-fold boom options, covered boom, or boomless nozzle kit
⇒ 300 litre tank
⇒ 6 litre handwash tank
⇒ Adjustable pressure valve from 1-4 bar; up to 2 bar for nozzle pressure – perfect for boom spraying with the standard low-drift nozzles
⇒ Flotation tyres – low compaction
⇒ Large filling lid
⇒ Rugged chassis
⇒ Full operators manual
⇒ Flip-up parking bracket
⇒ Tow hitch supplied
⇒ 20m hose reel with lance fitted standard
*20 litres per minute open-flow

Motorised model includes:
⇒ Honda-powered pump with pressure regulator – pressure available to 20bar with suitable spray gun fitted
⇒ Same features as 12-volt model – booms can be fitted if required
⇒ A selection of different reels is available, including an electric rewind reel holding 100 metres of hose
⇒ Ideal for nurseries, or for gun spraying on farms, in chicken sheds or for councils for gun spraying work
