

Horticultural Spraying Specialists

SprayWise® Horticultural Spraying Handbook

The Nufarm SprayWise® Horticultural Spraying handbook is without a doubt the most comprehensive guide to spray application in horticulture that is available anywhere.

Written largely by Dr Jorg Kitt, for Nufarm, it covers every aspect of spray application. Don from Horticultural Spraying Specialists also had a hand in advising on content and reading the original draft.

It is aimed squarely at managers, viticulturalists, agronomists and horticultural advisors. It can be a little complex in places but a better reference work you will not find.

Available now from Horticultural Spraying Specialists.

Information contained includes:

- ⇒ Nozzle information
- ⇒ Calibration information
- ⇒ Tree Row Volume
- ⇒ Weather risks to look out for
- ⇒ Sprayer types and their relative strengths
- ⇒ Coverage assessment guide
- ⇒ Formulation information
