

Horticultural Spraying Specialists Compression sprayers

Compression sprayers are also known as “pump-up” sprayers. They are commonly used in agriculture and horticulture for such things as degreasers, small spot sprayers for weeds around buildings, spraying the garden or applying cleaning products.

A very handy product to have. This range has a full selection of spare parts available too, not like the throwaway types available at hardware stores.

Models include:

At left:

319 and 320 models, 5 & 7-litre respectively.

- ⇒ High quality heavy duty 5 & 7 litre compression sprayers; wide filling neck, rugged shut-off gun, adjustable nozzle, pressure relief valve, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.
- ⇒ Most suitable for herbicides, insecticides & fungicides.

At left:

322-315 Industrial model

- ⇒ High quality heavy duty 9-litre compression sprayer for use with selected solvents and diesel.
- ⇒ Wide filling neck, rugged shut-off gun, adjustable nozzle, pressure relief valve, in-built pressure filter, brass lance. Lance clips into the handle for storage and transport.
- ⇒ Ideal for degreasers & other solvents.

At left:

320-310 Industrial model

- ⇒ The 7-litre acid sprayer resists hydrochloric muriatic and phosphoric acids. Ideal for staining and etching concrete and dissolving of rust on metal surfaces.
- ⇒ Ideal for our cleaning products – see our cleaning recommendations on the product page.
