

Horticultural Spraying Specialists Spray units for small holdings

Spraying can be a chore, especially if you don't have the right equipment. We have access to sprayers for smaller orchards or vineyards to allow time saving and the flexibility to do your own applications when the time is right.

You may be growing grapes, berries, tree-fruit or nursery trees – whatever your need, take a look at what we can offer.

For larger operations, you will have a choice of manufacturers and machinery dealers who have access to larger machines and multi-row options, which we currently don't supply. Remember to hop onto our technical information page and download the work rate calculator if you're looking at a larger sprayer. Or, you can simply call us for some advice.

Models include:

Above – trailed 300 litre pressure sprayer
Below – 300 litre airblast sprayer

Trailed 300 litre sprayer:

- ⇒ 300 litre tank
- ⇒ Honda-powered pump, capable of spray pressures from 5-30 bar
- ⇒ 5-nozzles per side verti-boom
- ⇒ Nozzles are designed for pressure spraying, with adjustable flow and angle
- ⇒ Vertiboom is adjustable for height and width
- ⇒ Flotation tyres for low compaction
- ⇒ Ideal for small holdings

3-point linkage 300 & 600 litre air-blast sprayers:

- ⇒ 300 litre with 500mm fan or
- ⇒ 600 litre with 800mm fan
- ⇒ Brass swing-over nozzles each side to allow for dilute or concentrate spraying without having to change nozzles
- ⇒ PTO shaft supplied
- ⇒ Manual tap controls standard, electric controls optional
- ⇒ High-pressure pump (to 40-bar) – usually set to 15 to 20 bar for canopy spraying
- ⇒ We fully calibrate and set up any of these options for you

We can assist you if needed with advice on larger sprayers.
