

# Horticultural Spraying Specialists Cleaning products

Our range of cleaning products is a “work in progress”.

Tank and equipment cleaner is a good start, but we are also evaluating other useful products to bring to our customers – watch this space!

We also recommend a couple of compression sprayers for use with products such as degreasers, or mildly acidic cleaning solutions. These are listed below.

Products include:

Pictured left:

Tank and equipment cleaner for removing chemical residues.

**At left:**

9-litre compression sprayer (pump up sprayer) for use with solvents and diesel products.

Ideal for use with degreaser for cleaning machinery.

**At Left:**

7-litre compression sprayer (pump up sprayer) for use with acidic solutions. Ideal for use with commercial grade cleaning products, especially those with power pH and are acid based.
