

Horticultural Spraying Specialists

3-point linkage sprayers

3-point linkage sprayers are most often used behind a tractor for the application of under-tree, under-vine herbicide or the application of soil improvement/nutritional products in orchards and vineyards. In vegetables or small fruits such as strawberry production, it may be for applying crop protection products or herbicides, or both.

Sizes vary from 300 litres to 1600 litres. Typically for vineyards and orchards the 300/600 litre would be the most likely fit for going up and down rows. For larger vegetable production the larger 800-1600 litre sizes may be a better choice.

Models include:

 <p>300 litre unit with 6-metre boom pictured</p>	<p>300 litre includes:</p> <ul style="list-style-type: none"> ⇒ Handwash tank ⇒ Flush tank ⇒ 300 litre main tank – fully draining ⇒ Galvanised frame ⇒ 80 litre per minute pump ⇒ PTO supplied ⇒ Adjustable height boom mount – set and forget ⇒ Basket and suction filtration ⇒ Manual tap controls, 5 outlets standard* ⇒ Tank agitator (*one outlet devoted to tank agitator) ⇒ Operators manual supplied <p>Options include:</p> <ul style="list-style-type: none"> ⇒ A choice of suitable booms & nozzles ⇒ Chemical suction probe or mixer ⇒ Basic electric or spray rate controllers, or a monitor
